The products

Since 2010 Evoko products has been sitting outside of meeting rooms all over the world.

Welcome upgrade!

Now the next generation Room Manager is here to take the hassle out of booking meeting rooms!

Welcome Evoko Liso!

EVOKO LISO – THE NEXT GENERATION ROOM MANAGER

New and old version will be able to **Co-exist**

New HW platform.

GUI for a more modern look and to more clearly show the room name and status.

Key additions to the existing version are:

- New ID – square & thinner
- 20 x 20 x 2,5 cm
- 8 inch display
- Great display and touch experience
- New GUI
- WiFi connectivity
- RFID or PIN authentication for end users
- Proximity sensor

Key additions to the existing version are:

- New SW capabilities (e.g. search for rooms and book them directly from the screen)
- Evoko Home (Multi-site management, stand-alone, update frequency, statistics etc.)
- Open API (to allow integration with other systems)

Key additions to the existing version are:

- Easy way to extract weekly/monthly statistics
- Cable management that allows you to exit in four different directions

Key additions to the existing version are:

- Admin role management

There will be 3 types of users:

1. Global admin.
2. Local admin.
3. Users

Global admin will be able to handle everything in the system. You can choose local admin for a country or a specific office. Users will not be able to administer, but there is possibilities to have different rights on the users (some users may only be able to book specific rooms and some may have the ability to "override" on other meetings etc.

Evoko Home

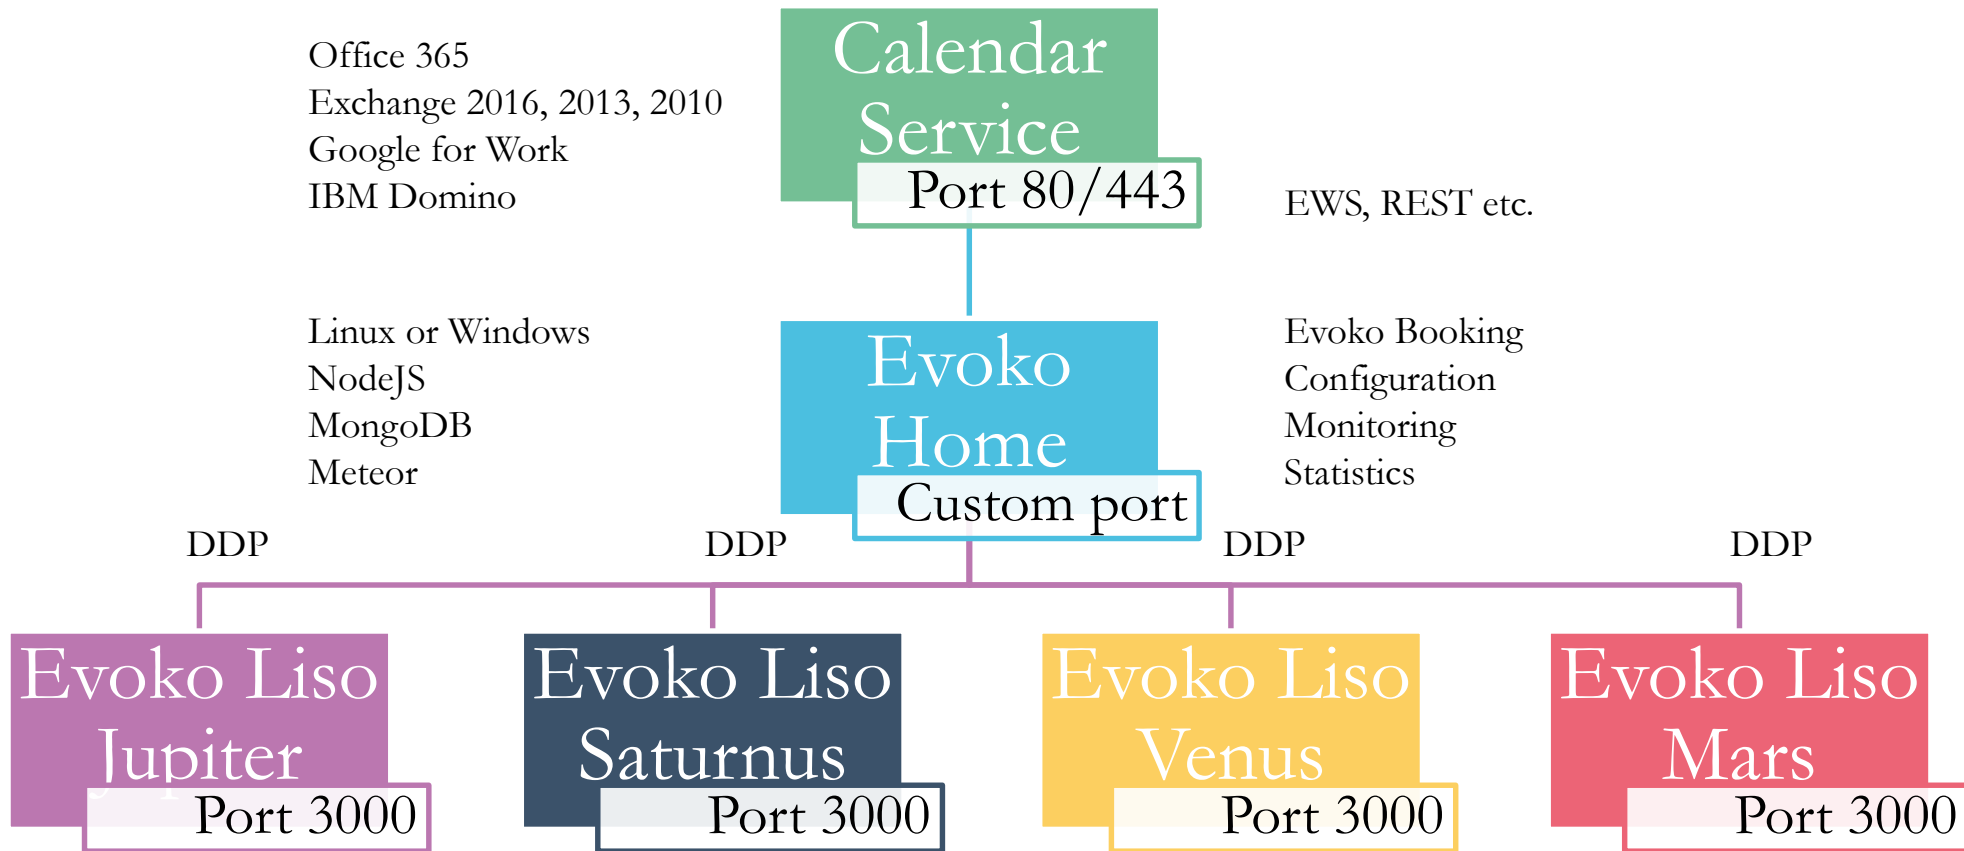

System requirements for Evoko Home

- 🕒 Windows or Linux OS
- 🕒 Minimum single core CPU, 2GB RAM 8GB storage to run the server.
- 🕒 Large installations and/or heavy utilization of the Evoko Booking feature will require additional CPU, RAM and storage.
- 🕒 The system need to have an free and accessible port that can be used by Evoko Home for communication with Evoko Liso using Meteor DDP protocol and for access to web application.
- 🕒 The system must be set up so that http (port 80) or https (443) is allowed between Evoko Home and the calendar service using EWS for Exchange or other API endpoint depending on environment.
- 🕒 To enable Evoko Home to receive push notifications from the Exchange server the Exchange server must be able to get direct access to Evoko Home.
- 🕒 Access to NTP server

Additional information

- 🕒 Secured and fused bootloader to prevent unauthorized firmware installation.
- 🕒 Support for modern cipher technology
- 🕒 Private and encrypted data transfer
- 🕒 Bandwidth efficient socket connection using DDP
- 🕒 Automatic import of rooms and users available
- 🕒 Real time monitoring and logging
- 🕒 Scheduled remote upgrade

System high level overview

MEETINGS MADE MAGNIFICENT

Evoko has now also been invited into the meeting rooms!

While the Evoko Room Manager has taken the hassle out of booking meetings...

...the Evoko Minto will take conference phones to a completely new level!

FOUR REASONS TO MEET WITH EVOKO MINTO

🕒 LOOKS GREAT

- Award winning design
- No ugly cables
- Store and charge on wall mount

The design is one of the keys to great performance. So easy to use that absolutely anyone can master it. Because it's battery power, you can use it instantly in any room you want. When finished, just put it on the Wall Mount to charge and free up the space on the meeting room table.

FOUR REASONS TO MEET WITH EVOKO MINTO

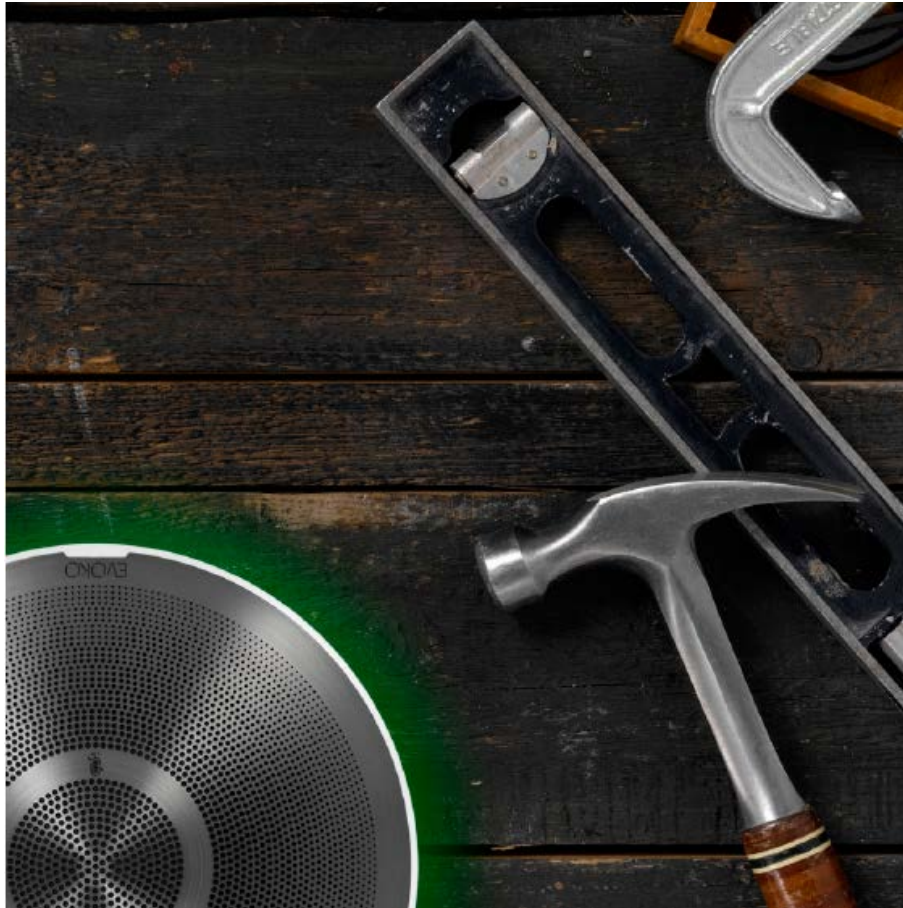

🕒 A MODERN TEAM PLAYER

- Use with your own mobile, tablet or laptop
- Ready for the UC application of your choice
- Battery powered to be used anywhere in the office

Evoko Minto works perfect with your mobile phone, Skype for business and Google hangouts. Connect with Bluetooth, USB or Audio Cable.

FOUR REASONS TO MEET WITH EVOKO MINTO

🕒 SO EASY TO WORK WITH

- Quickly connected and controlled from your own device
- Air swipe to mute
- Voice feedback and colors guide you

The blue color, showing you a Bluetooth device is connected, changes to green when a call is active and instantly shifts to red when muted.

Voice feedback guides you. Choose from 9 different languages.

FOUR REASONS TO MEET WITH EVOKO MINTO

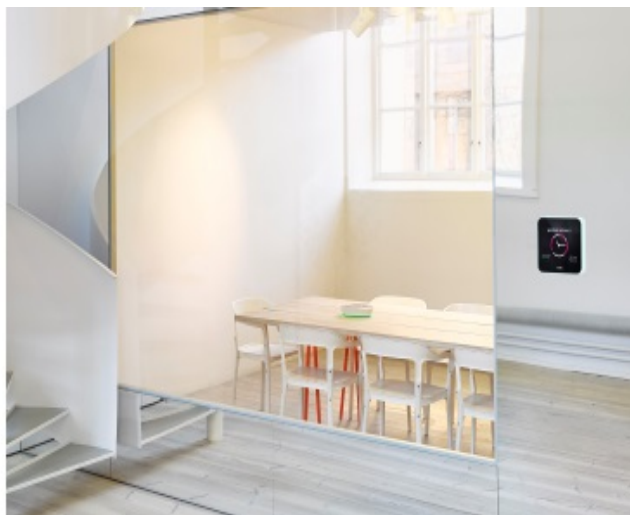

🕒 FANTASTIC LISTENER

- Removes noise and echoes
- Four directional microphone
- Everyone's heard at the same volume

Four directive microphones alternate to capture only the voice of the person talking and leave all distractions out.

Evoko Minto easily cover rooms for 20 people. Captures sound within a range of 10 m.
